Independent Auditor's Report

To the Retirement Board Public Employee Retirement System of Idaho Boise, Idaho

Report on Audit of Schedule of Allocations and Schedule of Collective Pension Amounts

Opinions

We have audited the accompanying schedule of employer allocations of Public Employee Retirement System of Idaho Base Plan (the System) as of and for the year ended June 30, 2022, and related notes. We have also audited the totals for the columns titled net pension liability (asset), total deferred outflows of resources, total deferred inflow of resources and plan pension expense (specified column totals) included in the accompanying schedule of collective pension amounts (collectively the Schedules) of the System as of and for the year ended June 30, 2022.

In our opinion, the Schedules referred to above present fairly, in all material respects, the employer allocations and net pension liability (asset), total deferred outflows of resources, total deferred inflow of resources, and plan pension expense for the System as of and for the year ended June 30, 2022, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Schedules section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Other Matters

We have audited, in accordance with auditing standards generally accepted in the United States of America, the financial statements of the Fund as of and for the year ended June 30, 2022, and our report thereon, dated October 12, 2022, expressed an unmodified opinion on those financial statements.

Responsibilities of Management for the Schedules

Management is responsible for the preparation and fair presentation of the Schedules in accordance with accounting principles generally accepted in the United States of America; and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the Schedules that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Schedules

Our objectives are to obtain reasonable assurance about whether the Schedules as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the Schedules.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the Schedules, whether due to fraud or
 error, and design and perform audit procedures responsive to those risks. Such procedures
 include examining, on a test basis, evidence regarding the amounts and disclosures in the
 Schedules.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is
 expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the Schedules.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control—related matters that we identified during the audit.

Restriction on Use

Our report is intended solely for the information and use of the System's management, the System retirement board, System employers and their auditors and is not intended to be and should not be used by anyone other than these specified parties.

Note 1 - Significant Accounting Policies

Employer contributions to the Public Employee Retirement System of Idaho Base Plan (the System) are calculated on creditable compensation for active members reported by employers. Employer contributions are accrued when paid and employers are statutorily required to pay a fixed percentage of compensation.

The Schedule of Collective Pension Amounts presents the deferred inflow of resources, deferred outflow of resources, pension expense (expense offset) and net pension liability (asset) at the Fund level. The Schedule of Employer Allocations (collectively, the Schedules) reflects current year employer contributions. Contributions and adjustments to contributions reported in the current year for service performed in a prior year are recognized as contributions in the current year and included in the Schedule of Employer Allocations. The Schedule of Employer Allocations includes the following for each individual employer:

- Employer name.
- The amount of employer contributing entity's contributions for the period July 1, 2021 to June 30, 2022, (the fiscal year).
- The employer contributing entity's contributions as a percentage of total employer contributions, as defined by state statute.

The Schedule of Employer Allocations has been rounded and presenting the first ten decimal places.

Basis of Accounting

Contributions for employers and the net pension liability (asset) are recognized on an accrual basis of accounting.

Use of Estimates in the Preparation of the Schedules

The preparation of the Schedules in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain amounts and disclosures. Actual results could differ from those estimates.

Relationship to the System's Basic Financial Statements

The Schedule of Employer Allocations also includes a reconciliation from total employer contributions to employer contributions shown in the System's Statement of Changes in Fiduciary Net Position. The optional retirement plan is a separate funding arrangement thus has not been included for allocation purposes. Other reconciling items consist of adjustments to employer contributions reflected in the individual employer level that are not reflected on the System's Statement of Changes in Fiduciary Net Position.

Components of Net Pension Liability

The components of the net pension liability of the System, for participating employers, as of June 30, 2022, are as follows:

Total pension liability System fiduciary net position	\$ 23,288,243,222 19,349,485,162
Employers' net pension liability	\$ 3,938,758,060
System fiduciary net position as a percentage of total pension liability	83.09%

The net pension liability is calculated using a discount rate of 6.35%, which is the expected rate of return on investments reduced by investment expenses. The net pension liability was determined by an actuarial valuation as of July 1, 2022, applied to all prior periods included in the measurement. Actuarial valuation involves estimates of the reported amounts and assumptions about the probability of occurrence of events far into the future. Amounts determined regarding the net pension asset are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. Economic assumptions were studied in an experience study performed for the period 2015 through 2020. Demographic assumptions, including mortality were studied for the period 2011 through 2017.

Actuarial Assumptions

The following are the actuarial assumptions and the entry age normal cost method, applied to all periods included in the measurement:

Inflation	2.30 percent
Salary increases including inflation	3.05 percent
Investment rate of return-net of investment fees	6.35 percent
Cost of Living (COLA) adjustments	1.00 percent

Several different sets of mortality rates are used in the valuation for contributing members, members retired for service and beneficiaries. These rates were adopted for the valuation dated July 1, 2021.

Contributing Members, Service Retirement Members, and Beneficiaries

_	,,,,,,,, .	
	General Employees and All Beneficiaries - Males	Pub-2010 General Tables, increased 11%.
	General Employees and All Beneficiaries - Females	Pub-2010 General Tables, increased 21%.
	Teachers - Males	Pub-2010 Teacher Tables, increased 12%.
	Teachers - Females	Pub-2010 Teacher Tables, increased 21%.
	Fire & Police - Males	Pub-2010 Safety Tables, increased 21%.
	Fire & Police - Females	Pub-2010 Safety Tables, increased 26%.
		5% of Fire and Police active member deaths are
		assumed to be duty related. This assumptions was
		adopted July 1, 2021.
	Disabled Members - Males	Pub-2010 Disabled Tables, increased 38%.
	Disabled Members - Females	Pub-2010 Disabled Tables, increased 36%.

The long-term expected rate of return on pension plan investments was determined using the building block approach and a forward-looking model in which best estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the System relies primarily on an approach which builds upon the latest capital market assumptions. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of PERSI's assets. The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation.

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Cash	0%	0.00%
Large Cap	18%	4.50%
Small/Mid Cap	11%	4.70%
International Equity	15%	4.50%
Emerging Markets Equity	10%	4.90%
Domestic Fixed	20%	-0.25%
TIPS	10%	-0.30%
Real Estate	8%	3.75%
Private Equity	8%	6.00%

Discount rate – The discount rate used to measure the total pension liability was 6.35%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plans' net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for administrative expense.

Sensitivity of the net pension liability (asset) to changes in the discount rate – The following presents the net pension liability of PERSI employer's calculated using the discount rate of 6.35% as well as what the employer's liability would be if it were calculated using a discount rate that is 1-percentage point lower or 1-percentage point higher than the current rate:

	1% Decrease Current Disco (5.35%) Rate (6.35)		1% Increase (7.35%)
Employer's net pension liability (asset)	\$ 6,951,522,210	\$ 3,938,758,060	\$ 1,472,888,533

Deferred Inflow of Resources and Deferred Outflow of Resources

Each employer will need to calculate two additional types of deferred outflows of resources and deferred inflows of resources which are employer specific amounts. These amounts relate the (1) net impact from changes in proportion (allocation percentage) between the periods; and (2) contributions made to the plan subsequent to the measurement date and before the end of the employer's reporting period.

Plan Pension Expense

Plan pension expense consists of changes that are expensed immediately as well as amortizations relating to the difference between expected and actual experience, changes in actuary assumptions and differences between projected and actual investment earnings on pension plan investments. The following table provides the detail of the plan pension expense:

Service costs and interest	\$ 1,994,362,867
Expected investment return	(1,371,562,553)
Effect of plan changes	274,272,094
Employee contributions	(315,161,350)
Administrative expenses	9,984,308
Other income	(5,569,585)
Amortization of difference between expected and actual experience	112,287,925
Amortization of changes of assumptions	264,429,267
Amortization of net difference between projected and actual	
investment earnings on pension plan investments	 57,987,831
Plan pension expense (expense offset)	\$ 1,021,030,804

The amortization period is based on the remaining expected service lives of all employees that are provided with pensions through the System determined at the beginning of the measurement period. The amortization period was calculated at 4.6 years. The amortization of the net difference between projected and actual investment earnings on pension plan investments is amortized over a closed 5-year period inclusive of this fiscal year.

The amount reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized as pension expense (expense offset) as follows:

2023	\$ 469,649,140
2024	509,848,848
2025	235,804,536
2026	748,634,322

Changes in Net Pension Liability (Asset)

The following table represents the changes in total pension liability and fiduciary net position for the year ended June 30, 2022:

	Total Pension Liability (a)	Plan Fiduciary Net Position (b)		ion Liability t) (a)-(b)
Balances at June 30, 2021 Changes for the year	\$ 21,691,680,851	\$ 21,770,658,824	\$	(78,977,973)
Service costs	596,927,904	-	5	96,927,904
Interest	1,397,434,963	-	1,3	397,434,963
Effect of plan changes	274,272,094	-	2	274,272,094
Experience gains and losses	457,371,784	-	4	157,371,784
Other income	-	5,569,585		(5,569,585)
Contributions - employer	-	470,847,210	(4	170,847,210)
Contributions - employee	-	315,161,350	(3	315,161,350)
Net investment income	-	(2,073,323,125)	2,0	73,323,125
Benefit payments including refunds				
of employee contributions	(1,129,444,374)	(1,129,444,374)		-
Administrative expense	<u>-</u>	(9,984,308)		9,984,308
Net Changes	1,596,562,371	(2,421,173,662)	4,0	17,736,033
Balances at June 30, 2022	\$ 23,288,243,222	\$ 19,349,485,162	\$ 3,9	38,758,060
